

Shaikh Mohammed Usman

Backend Software Engineer | Python | FastAPI | AI-Assisted Development | PostgreSQL | Docker | Microservices | Automation

✉ imusman46@gmail.com ☎ 7738517868 📍 Mumbai, India 🔗 LinkedIn 🐙 GitHub 📁 Portfolio

Profile

Backend Software Engineer with 2+ years of experience building scalable backend systems, microservices, multi-tenant SaaS applications, and automation workflows using Python, FastAPI, PostgreSQL, Redis, and Docker. Experienced in REST API development, asynchronous processing, Playwright-based browser automation, database optimization, third-party API integrations, and AI-assisted development workflows.

Skills

- Backend & Architecture:** Python, FastAPI, SQLAlchemy, REST APIs, Microservices, Distributed Systems
- AI & Development:** AI-Assisted Development, AI/ML Fundamentals
- Automation & Testing:** Playwright, Web Automation, Web Scraping, Pytest, Locust
- Databases & Caching:** PostgreSQL, Redis, Alembic, SQL, Database Design, Query Optimization, Multi-Tenant Architecture
- Async & Messaging:** Celery, RabbitMQ, APScheduler, Python Async, Event-Driven Architecture
- DevOps & Cloud:** AWS (EC2, S3), Microsoft Azure, Docker, Linux, Nginx, Traefik, GitHub Actions, CI/CD
- Security:** JWT, RBAC, OTP Authentication

Professional Experience

- Backend Software Engineer, Suflon Tech LLP** 

04/2024 – 05/2026 | Mumbai, India
- Designed and developed scalable **REST APIs and microservices** using Python and FastAPI, following modular and maintainable backend architecture.
 - Built **multi-tenant SaaS applications** across healthcare, CRM, e-commerce, and **business workflow management** domains using PostgreSQL multi-schema architecture for secure and isolated tenant data.
 - Implemented **asynchronous and background processing** using Celery, RabbitMQ, and APScheduler for automated workflows and scheduled tasks.
 - Optimized PostgreSQL queries and database schemas through **indexing, query optimization, and Redis caching** to improve application performance and reduce database load.
 - Developed **Playwright-based automation pipelines** for lead acquisition, data extraction, contact enrichment, and synchronization workflows, reducing manual data-collection effort.
 - Performed **load and performance testing using Locust** to evaluate API behavior under concurrent workloads and identify performance bottlenecks.
 - Implemented **JWT authentication, RBAC, and OTP authentication**, while integrating AWS S3, payment gateways, and third-party APIs.
 - Cloud & Deployment:** Deployed and maintained backend applications across **AWS and Azure** using Docker and Linux-based environments; configured Nginx and Traefik for routing and reverse-proxy requirements.
 - Production Troubleshooting:** Analyzed application and infrastructure logs to investigate deployment and runtime issues and troubleshoot backend services across cloud environments.

Education

- M.Sc. Information Technology**, *Thakur College of Science and Commerce*

07/2023 – 05/2025 | Mumbai, India
- Java Core-to-Advanced Certification**, *Anudip Foundation*

01/2023 – 06/2023 | Mumbai, India
- B.Sc. Information Technology**
Maharashtra College of Arts Science and Commerce

06/2019 – 05/2022 | Mumbai, India
